Subject
TexCom Wells

Hello Mr. Jim:

We have received an inquiry from a Conroe citizen in connection with the Class I wells that TexCom has proposed in Montgomery County. The attached image files contain maps showing the area in which the citizen's property (solid black circle) and the wells in question (solid green circles) are located. At this point in time, I do not have details of how the wells will be completed, and would like to know if you have schematics for these wells (WDW-410, WDW-411, WDW-412 and WDW-13), either in electronic or hard copy format, that you may wish to share with us. I assume that you will be part of the team reviewing the applications, but if you are not, I would appreciate your leading me to the person who may be involved with the applications. Thanks in advance for your assistance. Have a great afternoon. Sincerely,

Jose Eduardo Torres
